INDUSTRY INSTITUTE INTERACTION CELL (III)

INTRODUCTION

Better communication between institutions and industries is the need of the hour. For students it is important because they experience industrial exposure and subsequent placement in various fields. On the other hand, with the advent of globalization and the opening up of the Indian economy abroad, competition between industries has intensified. Industries therefore need good students who are well versed in industry standards .

“Industry-Institute-Interaction” provides a platform for both the students as well as faculty members to be aware of industry expectations of skill sets required for students. This enables students to be aware of the lacunae in their skills and provides an opportunity to upgrade them. It also enables Faculty to be aware of industry expectations & train students to meet these expectations...

FUNCTIONS

To enable the students acquire the necessary skills for observing the concepts taught in the classroom by solving projects in industries.

To take up consultancy work and solving them using the expertise of the faculty and students.

To provide assistance to industry in the area of testing the quality of various products and materials as per the industrial standards

To encourage the students to visit a wide range of industries and technical exhibitions to keep them updated of the scenario prevailing in their field of study.

To provide industrial internship for pre-final year students to confront real-life challenges and learn the state of art of technology and process to add to their core competency

To develop partnerships strategies by signing MOUs with pharmaceutical companies

To organize Workshops, conferences and symposia with joint participation of the faculty and the industries.

To invite experts from industry to participate in curriculum development & sharing their updated expertise and knowledge with staff and students.
 To arrange visits of faculty & students to various Industries and vice-versa
 To coordinate for the research projects from industry
