Aim:

To spread awareness about hand wash and its importance to the people who are unaware of it.

To make them aware of the benefits of using hand wash and soaps.

To prevent them from Harmful diseases which can cause due to lack of cleanliness and sanity.

Topic of discussion:-

- Importance of hand washes at regular intervals to the people who are unaware of it, and have a lack of basic amenities.
- The benefits of using liquid hand wash and a soap.
- The correct way or techniques of hand wash to achieve maximum cleanliness and sanitization.
- Harmful diseases which can occur due to lack of sanity.

We presented demonstrations and speeches in easy local language that can be easily understood by local slum public.

Promotion of Campaign: We promoted the campaign in college and also by forwarding the message containing details of campaign.

- 👉 The people in that area were very cooperative and attentive during the session
- 👉 Mostly the children present were very keen throughout the session and kept coming up with their curious questions.
- 👉 We also demonstrated on how to make liquid hand wash using solid hand wash powder which is a cheaper substitute for liquid hand wash used which is quite expensive.

The event successfully ended with distribution of solid powder handwashpouches on the behalf of our college and bottles.

- The event was scheduled as the **world hand wash awareness week** is near, and to make society aware of importance of hand wash.
- Harmful diseases due to lack of proper sanitization affects millions of people worldwide, particularly unprivileged part of society. We hope this small contribution of ours will help the people to get aware and remain healthy by practicing hand wash regularly.
