Webinar on Computer Aided Drug Design (CADD) 2021-22

# ORIENTAL EDUCATION SOCIETY'S ORIENTAL COLLEGE OF PHARMACY

Approved by AICTE, PCI, D.T.E., Affiliated to University of Mumbai & Certified by ISO 9001:2008

## About the Webinar:

Drug discovery is a very time consuming and fund draining process. Traditional drug discovery process involves a lot of synthetic and biological work. Computer Aided Drug Design (CADD) helps scientists in minimizing the synthetic and biological testing efforts by focusing only on the most promising compounds. Besides explaining the molecular basis of therapeutic activity, it also predicts possible derivatives that would improve the activity. Thus, Drug discovery and development process is being streamlined using computing power. Traditional experimentation which requires animal and human models can be replaced by CADD, saving both time and cost. CADD also leads to the construction of high-quality datasets and libraries that can be optimized for high molecular diversity or similarity. The main aim of this webinar is to make all attendees acquainted about the basic strategies used in Computer Aided Drug Design. It will also help us to acknowledge the application of CADD in modern drug discovery and development.
